# Table EU LIQB on qualitative information on LCR, which complements template EU LIQ1. in accordance with Article 451a(2) CRR

Row number	Qualitative information - Free format					
(a)	Explanations on the main drivers of LCR results and the evolution of the contribution of inputs to the LCR's calculation over time	The main drivers of LCR results are high-quality liquid assets, outflows and inflows.				
(b)	Explanations on the changes in the LCR over time	Over time, the liquidity buffer increased mainly due to a purchase of central government assets, what was outweighted by an increase in total net cash outflows, mainly due to an increase of non-operational deposits. This caused the decrease of liquidity coverage ratio.				
(c)	Explanations on the actual concentration of funding sources	The main funding sources are retail deposits. Significitant funding sources are current accounts of non-financial corporates and deposits by soveregns and financial customers.				
(d)	High-level description of the composition of the institution's liquidity buffer.	Liquidity buffer of the VÚB bank is composed of withdrawable central bank reserves, central government assets and covered bonds.				
(e)	Derivative exposures and potential collateral calls	The VÚB bank has a low derivative exposure with minimal impact on liquidity.				
(f)	Currency mismatch in the LCR	The VÚB bank has no material currency mismatch in the LCR. the currency denomination of the bank liquid assets is consistent with the distribution by currency of the bank net liquidity outflows. The LCR is calculated and reported in EUR. None of the foreign currency is significant in accordance with Article 415(2) of Regulation (EU) No 575/2013.				
(g)	Other items in the LCR calculation that are not captured in the LCR disclosure template but that the institution considers relevant for its liquidity profile	The VÚB bank does not consider other items relevant for its liquidity profile.
